

Let's make every place feel welcoming for young people with disability.

Cérge.

Deliver Access + Promote Inclusion

What is Cérge?

Cérge is a set of companion technologies helping venues better support people with disability by improving how information is shared and how service teams interact.

We help remove two of the biggest barriers to access:

- Not knowing what to expect when visiting a place.
- Not knowing how you'll be treated when you get there.

Cérge Tools

Visual Story & Sensory Guide

Shows what the venue looks and feels like with photos and short descriptions.

Virtual Tour

Explore the venue online in a 360-degree view before you go.

Access Guide

Key details about accessible parking, bathrooms, pathways, and other important features.

Audio Guide

Gives an audio overview of the venue description and its accessible features.

Communication Board

A visual tool with images and symbols to help you communicate with staff.

Keyword Sign Board

Simple signs that staff can use to support inclusive communication during your visit.

Social Impact

Here's how Cérge is making a difference:

- Helps venues welcome more people and become truly inclusive.
- Gives young people and families the confidence to try something new.
- Supports staff and volunteers to deliver better customer service with the right information.
- Encourages a future where inclusion is part of every community experience, not an afterthought.

What People Are Saying

"It's like seeing a rainbow sticker in a business window shows you that business is LGBTIQA+ friendly and having Cérge shows you they are inclusive and care about being as accessible as they can be."

"Implementing Cérge made absolute sense as it improves access for our community, helping us to meet their needs. It enables us to be more inclusive by having all our information about our venue easily accessible."

"I know Cérge isn't about making sure every business is spot on with their access but what Cérge does is give you all the information on the venue so that you can make an informed decision. This just makes sense."

"Using Cérge gave me more confidence. I can't wait to see more places use it."

"If a business has Cérge, we know they care, and that is a nice feeling."

"We didn't have to change everything in our business to become inclusive, what we have to do is share what we have. The power to choose is in the people, once they have all the information."

"So..... here's where the magic happened! Cérge put me in the driver's seat, allowing me to decide which of my access needs I shared and the level of detail I felt comfortable sharing. See ya later assumptions!"

"Cérge enabled me to go outside my comfort zone and made me realise that now, thanks to Cérge, that comfort zone has grown enormously."
